

LITTLE BEAR RIVER DISTRIBUTION SYSTEM

** 1969 ASSESSMENT **

\$ 1,100.00

FORWARD:

The 1969 Water Assessment is to be again based on the Commissioner's Annual Report of water delivered during the year 1968. The commissioner reports that 49,027.10 acre-feet of water was delivered during 1968.

CALCULATION OF 1969 ASSESSMENT:

The first step is to determine the minimum \$ 5.00 users and maximum (or less) of acre-feet delivery for such users.

\$ 1,100.00 divided by 49,027.10 acre-feet of water equals \$ 0.0224366165 and \$ 5.00 divided by \$ 0.0224366165 equals 222.85 acre-feet of water (or less) as the minimum amount of water assessed for a minimum assessment of \$ 5.00.

There are 23 such users whose total delivery of water is 1,946.70 acre-feet of water which subtracted from 49,027.10 leaves 47,080.40 acre-feet of water to be assessed against the remainder of the users.

	\$ 1,100.00 equals	49,027.10 ac/ft
less	<u>115.00</u> equals	<u>1,946.70</u> ac/ft
therefore	985.00 equals	47,080.40 ac/ft

\$985.00 divided by 47,080.40 ac/ft of water equals \$ 0.0209216574, cost of one pro-rated acre-foot of water when multiplied times the amount listed for each user is his/her 1969 Water Assessment.

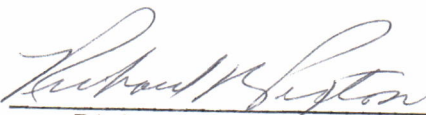

PROOF:

47,080.40 ac/ft times \$ 0.0209216575 equals \$ 985.00

23 times \$ 5.00 equals 115.00

TOTAL 1969 ASSESSMENT \$1,100.00

Prepared by:

Richard R. Pexton
February 28, 1969

Note: The above assessment computed on erroneous figures of water delivered. This was not manifest until April 9, 1969 when a new delivery schedule was received from Doc Hansen, Losan office, after 1969 Assessments had been mailed.
